

ARMOR AFTERMARKET

Rebuilds & Modernizations

Armor Aftermarket offers rebuild and modernization services for all Armor products including Cincinnati Industrial Machinery, Armor Mobile Systems, Victory Industrial Products, and PQ Shelters. Rebuilding allows you to replace problematic parts and assemblies without costly replacement of the entire equipment, minimizing lost production time.

Rebuild & Modernization Advantages

- Reduces down time and maintenance costs by eliminating constant repairs that interrupt production
- Rebuilding portions of your equipment is less expensive than the purchase of an entire replacement machine with minimal impact to your production schedule
- Reduce cost of ownership by incorporating energy saving motor packages
- Extend the life of your machine by replacing and modernizing major components rather than replacing the entire machine

Why Armor Aftermarket?

- Our Aftermarket engineers can assess your equipment with a comprehensive field audit to identify areas requiring repair, replacement, or adjustment. A detailed estimate can be provided that outlines what is required to restore your equipment to factory performance and specification.
- Our Aftermarket team is factory trained and fully familiar with all aspects of assembly, repair, and maintenance of your equipment. Our team is completely cross functional and will provide all the required skill sets to do the job professionally.
- All Aftermarket work and components conform to the latest OEM specifications to ensure sure fit and optimum performance.
- After our Aftermarket team rebuilds and restores your equipment, we provide a comprehensive Planned Maintenance Contract to ensure consistent peak performance.
- Our Parts and Service Department has you covered for years to come with OEM replacement parts, Planned Maintenance Agreements, and fast, reliable service.
