

**ARMOR
AFTERMARKET**

Installation Services

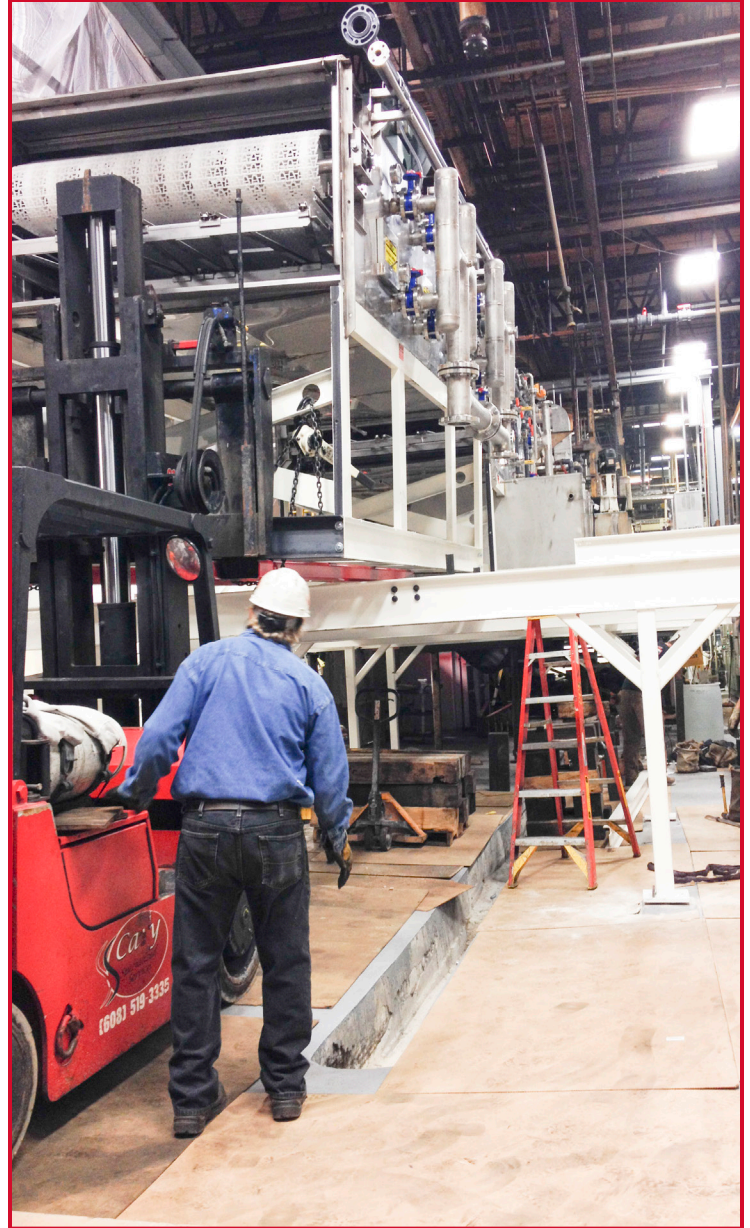

Armor Aftermarket offers installation services for your Armor machinery, including Cincinnati Industrial Machinery and Alvey® Washing Systems. We offer two types of installation services to fit your needs.

Turn-Key Installation

- A team of highly-trained Armor service technicians will travel to your site to provide turnkey installation service
- The installation can be scheduled at your convenience to avoid or minimize downtime at your facility
- A series of run-off tests is performed with your team to ensure all equipment is installed and operating properly and efficiently
- We provide training of your staff on how to operate the equipment
- Your warranty is validated and begins when the equipment installation is completed to your satisfaction per our terms and conditions

Start-Up Supervised Installation

- An experienced Armor service manager will travel to your site to supervise your team of employees' installation of new equipment
- Save money by using your workforce to do the labor.
- A series of run-off tests is performed with your team to ensure all equipment is installed and operating properly and efficiently
- We provide training of your staff on how to operate the equipment
- Your warranty is validated and begins when the equipment installation is completed to your satisfaction per our terms and conditions
