

Finishing Systems

**CIM designs, engineers, fabricates, installs,
and services finishing systems to coat any type of product**

Wet Paint Systems

- Fully integrated turnkey systems designed for your industrial application
- Overhead monorail, enclosed track, and conveyor systems
- Systems can be integrated into existing finishing system or built for use with new equipment
- High quality components and craftsmanship
- Multiple material handling

Powder Coating Systems

- High-quality finishing system for a more durable finish than liquid paints
- Systems include manual, automatic unit, small batch, or automated conveyor
- Environmentally friendly finishing option with no solvents involved, creating a virtually pollution-free application
- Provides an even coating with minimal waste and maximum efficiency
- CIM takes into consideration factors such as durability, noise, efficiency, lighting, and cost when designing a system

Electro-Coating Systems

- State-of-the-art eCoating systems are custom designed for your application
- Electro-coating provides a high quality finish in an efficient and environmentally friendly way with applications for many industries
- The benefits of eCoat finishing system include a uniform thickness, complete coverage from edge to edge and superior color and gloss control that is stain, chemical and detergent resistant
