

Alvey GI-2 Plastic Drum Washer

Efficiently Clean Up To 55-Gallon Plastic Drums

The Alvey Model GI-2 both washes and sanitizes various industrial containers on-site in a fully contained stainless steel cabinet.

This industrial washer is primarily suited for the food & beverage and chemical industries to quickly wash and release cleaned drums back into production.

No longer is it necessary to devote a separate room for washing plastic drums. The cabinet design allows a single operator to simply place the drum into the washing chamber, close the door, and push the 'start' selector switch. The GI-2 does the rest!

Benefits

- Avoid supply chain constraints of sourcing new containers
- Ease of use by a single operator requires no additional hiring
- Sustainable & economic outcomes of reuse

Features

Wash Chamber

- Nozzles are designed to wash and rinse both inside and outside of containers
- Accepts up to standard plastic 55-gallon drum size (23 1/4" x 35")
- Cycles are based on available utilities

Housing

- 14 gauge 304 stainless steel construction
- Adjustable sanitary feet
- Heavy-duty stainless steel door
- Removable filter basket

Additional Features

- Fully automatic self-contained cleaning
- Safety door limit switch
- Heavy-duty stainless steel construction
- Compact space-saver design
- Steam compatible

Specifications

Fixed Cycle

- Cold Wash: 45 seconds
- Steam Spray: 30 seconds
- Hot Rinse: 15 seconds

Required Water Flow Rates

- Cold Wash: 21 GPM @ 40 PSIG & Ambient
- Hot Rinse: 21 GPM @ 40 PSIG & 140°F

Required Steam Flow Rate

- Steam Spray: 125 lbs/hour @ 10 PSIG (saturated steam)

Consumptions Per Pre-Programmed Cycle

- Cold Wash: 15.75 gallons
- Steam Spray: 1.04 gallons
- Hot Rinse: 5.25 gallons

Power

120 volts | 1 PH. | 60 HZ | FLA=1
