

Internal Bake Ovens

Leading the can washing industry since 1965

Cincinnati Industrial Machinery offers Internal Bake Ovens (IBO) designed for the two piece beverage industry

We have been leading the industry since 1965 with our line of quality can washers, many of which are still in use 40 years or more after installation with extremely high up-time. We pride ourselves on the quality of our machines and our customers around the world benefit from this high up-time, low maintenance, and more efficiency in their can washers and ovens. Our state-of-the-art IBOs are built for maximum efficiency, up-time, and ease of maintenance. Our team of engineers and project managers works with your needs to accommodate various can heights, line configurations, and curing times. We stand behind the quality of our IBO ovens and our commitment to total customer satisfaction.

IBO Oven Features

- Adjustable upper supply plenum to adjust for height without shutting the oven down or moving the metal nozzles by hand
- Six inch oven walls made of 4 lb/cubic foot mineral wool to reduce heat loss
- Synthetic belt conveyors with tracking device for decreased warm-up time and conveyor wear
- Dual exhaust fans with variable speed to minimize condensation
- Built to your specs with speeds up to 6,000 cans per minute
- Gas fired, thermal convection type oven
- Zone temperature controllers to ensure consistency of temperature throughout the mat
- Tongue and groove insulated panel assemblies made from aluminized steel to reduce heat loss
- Stainless steel conveyor slider bed to prevent corrosion or contamination
